

NEW FROM M. C. MILLER

Tired of carrying a **BIG, BULKY** current interrupter?
Do you wish there was a more user friendly programming interface?
How about an interrupter that can fit inside a rectifier for greater security?
Once again, M. C. Miller's ingenious engineers answer the call!

Introducing the **TH100A** 100 AMP CURRENT INTERRUPTER

The **TH100A** is a modern current interrupter using the latest technology in current control and digital communication.

Capabilities:

- Interrupts 100 A at 150 VDC
- Cool to the touch - even at full rated current
- Can be synced to Cronos, JR-1 or JR-2 units - works with your existing interrupters
- Can provide immediate or scheduled interruption operations

Features:

- Compact, lightweight, sturdy construction
- Bluetooth™ enabled - can be programmed via simple Android™ application
- High accuracy Real Time Clock, on/off cycles from 1 millisecond to 6 months
- Powered by 4 user-replaceable AA batteries

You get all the functionality of a 100 Amp interrupter plus the convenience of Bluetooth™ programmability, as well as M. C. Miller's high quality components and manufacturing standards at a price that will make the office budget happy.
